Sound Advice:
Keeping track of your music selections

"Pachelbel's Canon in D" has been a classic for more than 300 years, but is not likely downloaded to your iPod. To make your wedding day truly yours, consider choosing your favorite bands and musical genres to accompany your festivities. Even if they seem a little untraditional for the classic wedding day, the juxtaposition will be your personal signature that guests never forget. Take this list to a planning session with your music specialist to discuss your options.
